57552

BBA 6th Semester (N. S.) 2014-17

Examination – April, 2018

SYSTEM ANALYSIS AND DESIGN

Paper : BBAN - 602

Time : Three Hours]

[Maximum Marks : 80

Before answering the questions, candidates should ensure that they have been supplied the correct and complete question paper. No complaint in this regard, will be entertained after examination.

Note : All questions of Section – A are compulsory. Attempt any four questions from Section –B, selecting at least one question from each Unit. All questions carry equal marks.

SECTION – A

1. Explain the following in brief :
 - (a) Overview of relational DBMS
 - (b) Explain distributed data processing .

57552-3,800-(P-3)(Q-9)(18)

P. T. O.

- (c) Benefits of prototyping in software development.
- (d) Major advantage of database.
- (e) I-O design.
- (f) Equipment specification.
- (g) Types of distributed database.
- (h) Data replication.

SECTION - B

UNIT - I

- 2. What is SDLC ? Discuss various operations involved at various stages of SDLC.
- 3. List and discuss the different types of project feasibility factors. Is any factor most important ? Why or why not ?

UNIT - II

- 4. How can DFDs be used as analysis tools ? Explain the guidelines for deciding when to stop decomposing DFDs.
- 5. How design consideration are different in distributed system ?

57552-3,800-(P-3)(Q-9)(18) (2)

UNIT - III

- 6. How do you know when to use Structured English, decision tables, or decision tree ? Which is best for what situation ?
- 7. Discuss the organizational issues involved in system implementation. How these issues can be resolved ?

UNIT - IV

- 8. What do you mean by architecture of distributed database system ? What different types of architecture ? Discuss each of them with neat sketch.
- 9. What is distributed database designing ? Discuss the purpose and uses of distributed database designing.

57552-3,800-(P-3)(Q-9)(18) (3)
