

M.Tech. 3rd Semester Electrical Power System**Examination, December-2017****DIGITAL CONTROL SYSTEM****Paper-MTEPS-301(i)****Elective-III***Time allowed : 3 hours]**[Maximum marks : 100**Note : Attempt five questions in all.*

1. (a) What are the basic elements of digital control system, explain them briefly ?
(b) Explain ideal low pass filter.
(c) Why we need Laplace transform, explain it briefly ?
(d) How we can do mapping between s-plane and z-plane ? 20
2. Explain the various properties of Laplace transform. 20
3. Explain Liapunov stability analysis of discrete time system. 20
4. What are the different analytical design method for transient response ? 20
5. Write short note on : 20
 - (a) Principle of duality
 - (b) Dead beat response

23293-P-2-Q-8(17)**[P.T.O.]**

6. Write short note on : 20
- (a) Minimum order state observer
 - (b) Ackerman's formula
7. Explain the single board controller with custom-designed Chi MTEPS. 20
8. Explain the effect of finite word length and quantization on controllability and closed loop pole placement. 20
